

# AUDIENCE

- ❑ Policy Makers
- ❑ MBTA (especially engineers and managers)
- ❑ Housing Developers
- ❑ Advocates

## Objectives

To acknowledge that the effects of climate change on Boston extend beyond sea-level rise and that adverse weather disproportionately affects vulnerable populations.

Identify vulnerable neighborhoods that are acutely impacted by storm delays and closures. Identify transit lines where the MBTA should prioritize repairs and improvements to increase storm resiliency so that vulnerable neighborhoods have faster and more consistent service.
